Product Owner - Self-Evaluation Checklist

Responsibility	Actions	Seldom	Often	Always
Manage stakeholder expectations				
	I collaborate with the business stakeholders regularly to understand their needs			
	I conduct meaningful value-driven conversations with stakeholders rather than just noting down their requests			
	I understand what business value will be delivered by each requested feature			
	I am able to find balance when there are different customer/stakeholder voices			
	I am able to set realistic expectations from stakeholders on scope and schedule targets			
	I organize product reviews for stakeholders on a regular basis (once in 2-4 weeks)			
Develop Product Vision and Strategy				
	I have good knowledge about our product	_ <u> </u>		_ <u> </u>
	I can answer questions about our product in a concise and motivating manner	<u></u> _		<u></u> _
	I spend time in learning more about the product, its domain and the competition			
	I create and maintain a visual Product Roadmap that all can see			
	I follow an adaptive planning approach that balances incoming demand with team's capability			
Create and Mair	ntain Product Backlog			
	I have good understanding of Agile concepts like MoSCoW model, Kano model, MVP, MMF, Walking Skeleton, Personas, Vertical Slicing, Story Point estimation			
	I understand and use the user story format to capture business requirements			
	I ensure all user stories are INVEST			
	I keep the product backlog transparent to the team			
	I keep acceptance criteria up to date, and keep the team informed about changes			
	I prioritize user stories regularly based on business value and risk			
	I ensure the top few items in the Product Backlog are always the highest priority stories planned for the next few weeks.			
Help Dev team maximize business value delivery				
	I pay attention to ensure team's efforts are well aligned with Product vision			
	I ensure team gets an opportunity to understand requirements before they commit to it			
	I respect team's current capability and try to balance demand accordingly			
	I take requirements to the team strictly in order of priority, rarely allowing a			
	low/medium priority item to be picked before a high priority items			
	I let team estimate work and finalize dev approach, and do not push my own			
	I track the product progress using relevant metrics			
Collaboration with Dev team				
	I have a positive working relationship with the team that is based on trust and mutual respect			
	I attend Daily Standup whenever I can, so I am well informed about the team's progress and concerns			
	I am available to the team on a priority basis			
	I respond to requirement clarifications from team in a timely manner (< 1 to 4 hours)			
	I review work items completed by team members and provide timely feedback (< 2 days)			
	I use a positive language with team members to encourage commitment and better quality			
	I celebrate team's success with them			
Seldom	Low compliance - less than 30%			
Often	Medium compliance - 30% - 70%			
Always	High compliance - more than 75%
